Professional Summary

- Full-Stack Developer and third-year Computer Science / Information Systems student at Badr University in Assiut; enrolled since 2024, expected graduation 2028.
- Builds end-to-end applications with React, Node.js/Express, ASP.NET Core, SQL Server, and MongoDB.
- Experienced in REST API development, database design, application security, payment and shipping integrations, testing, debugging, and deployment.

Education

Badr University in Assiut - Computer Science / Information Systems | 2024 - Present
Third-Year Student | Currently Enrolled | Expected Graduation: 2028

Work Experience

C2A LAP - Full-Stack Developer | Nov 2025 - Present

- Use dashboard analytics to clarify where money is spent, monitor sales and profit flows, and support faster profit assessment and business decisions; the platform also contributed to increased sales.
- Develop and maintain a laptop e-commerce platform with a React/Vite storefront and an administrative dashboard for products, orders, sales, expenses, and profit tracking.
- Build backend REST API modules for authentication, users, products, sales, online orders, shipping, and storefront settings using Node.js and Express.js.
- Implement product search, cart, checkout, order tracking, Arabic/English interface, and dark/light themes; add features to expand platform functionality.
- Integrate Paymob, InstaPay, cash on delivery, Bosta shipping, and WhatsApp/email notifications; support Excel inventory import/export and order operations.
- Apply JWT authentication, CSRF protection, password hashing, role-based access control, rate limiting, input sanitization, and SSRF protections; deploy on Railway.
- Improved website performance and speed by 16% and added features that enhanced the platform's functionality.

Projects

Donation Call-Center and Odoo ERP Integration API | Jul 2026 - Oct 2026

- Designed an integration flow connecting a donation call-center system with Odoo ERP using Transactional Outbox and Integration Inbox patterns.
- Defined REST API contracts for batched event polling and acknowledgement, with event IDs, versioning, and idempotent processing.
- Handled failed and out-of-order events and designed atomic bank-deposit allocation across multiple receipts.

C# Windows Forms Application | Jul 2025 - Oct 2025

- Developed a Windows desktop application using C# Windows Forms with SQL Server database integration.

Training & Courses

El Orman Charity Association - Technical Training | Summer 2024; Summer 2026
Integration design between a donation call-center system and Odoo ERP, REST API event processing, and bank-deposit allocation workflows.

Orascom - Trainee | Aug 2024
Training exposure to telecommunications infrastructure and software development practices.

National Bank of Egypt - Trainee | Jan 2025
Exposure to enterprise banking systems and financial-data workflows.

AST - Digital Egypt Pioneers Initiative (DEPI), Round 5 | Jun 2026

React Training - El Rowad | Jun 2026

Certifications & Achievements

CS50 - ITI | Python Training - Microsoft (online, through the Spring training program) | Microsoft Training | Problem Solving in C++ | ITI Certificate | ICPC / ECPC Qualifier - Aug 2026

Technical Skills

C#, JavaScript (ES6+), C++, Python, React, Vite, HTML5, CSS3, Tailwind CSS, Framer Motion, Axios, Node.js, Express.js, ASP.NET Core Web API, EF Core, LINQ, Windows Forms, REST APIs, SQL, SQL Server, MongoDB Atlas, database design, full-stack development, application security, JWT, CSRF protection, RBAC, bcrypt, rate limiting, input validation, SSRF protection, unit testing, debugging, Agile, Scrum, CI/CD, Docker, Kubernetes, cloud services, Microsoft Azure, AWS, microservices, DevOps, Git, GitHub, Railway, Excel import/export, Odoo ERP, Paymob, Bosta Shipping API, WhatsApp API (UltraMsg), and Nodemailer.

Personal & Soft Skills

Problem-solving, communication, teamwork, time management, organization, fast learning, attention to detail.
